

Schink Stories Email Examples

Generated on 8 June 2026 from the current repository at
/Users/luanvanderwalt/Documents/Websites/Schink-Stories.

Important: the repo contains exact inline email bodies for contact and internal store notifications. For published Resend templates and Supabase Auth emails, the repo contains template IDs, timing, recipients, and variables, but not the provider-hosted rendered template body. Those sections therefore show concrete examples of the payload and a representative rendered copy based on the variables the system sends.

At-a-glance Send Map

Email	When sent	Audience	Template/source
Contact internal notification	After /api/contact validates and passes rate/spam checks.	Internal	Inline Resend HTML/text
Contact auto-reply	Immediately after the internal contact email succeeds.	Customer	shink-contact-auto-reply
Abandoned checkout recovery	Scheduled at +1 hour, +24 hours, +7 days after subscription/store checkout starts.	Customer	3 published Resend templates
Store paid notification	When a store order first changes to paid.	Internal	Inline Resend HTML/text
Store order confirmation	When a store order first changes to paid.	Customer	shink-store-order-confirmation
Subscription confirmation	After PayFast or Paystack subscription payment is persisted.	Customer	shink-subscription-confirmation
Subscription ended	When paid access is cancelled or expires after recovery failure.	Customer	shink-subscription-ended
Subscription recovery	After failed recurring Paystack authorization; immediate/day-3/day-5 sequence.	Customer	3 published Resend templates
Admin ops alert	Operational subscription and recovery events.	Internal	shink-admin-ops-alert
Password reset	User/admin requested password reset.	Customer	Supabase Auth template
Email change confirmation	Signed-in user requests an email address change.	Customer	Supabase Auth template

SUPPORT_EMAIL=support@example.com
```

Representative rendered copy:

Hallo Mia,

Jou Alle Stories intekening is gekanselleer. Jou gratis stories bly beskikbaar, en jy kan enige tyd weer 'n plan kies.

8. Subscription payment recovery sequence

Trigger	Failed recurring Paystack authorization for an active subscription, followed by recovery email scheduling.
Templates	shink-subscription-recovery-day-1, day-3, day-5
Schedule	Day 1 immediate; Day 3 at first failure +2 days; Day 5 at first failure +4 days.
Manual send	Admin can send an immediate recovery email for active/failed recovery cases.

Template variables sent to Resend:

```
CUSTOMER_NAME=Mia
BILLING_URL=https://www.schink.co.za/intekening-en-betaling
RECOVERY_URL=https://www.schink.co.za/intekening-en-betaling
RECOVERY_ACTION_LABEL=Werk jou betaling by
RECOVERY_CONTEXT=Ons kon nie jou intekeningbetaling verwerk nie.
PLAN_NAME=Alle Stories
PAYMENT_PROVIDER=paystack
```

Representative Day 1 copy:

Hallo Mia,

Ons kon nie jou Alle Stories betaling verwerk nie. Jou toegang is nog in 'n hersteltydperk. Werk asseblief jou betaling by om jou stories aan te hou luister.

9. Admin ops alert

Trigger	Operational subscription/recovery events and selected failure paths.
Template	shink-admin-ops-alert
To	Resend:ToEmail.
Examples	subscription confirmed, recovery started/skipped, subscription ended, PayFast persist failed.

Template variables sent to Resend:

```
ALERT_TITLE_TEXT=Subscription payment recovery started
ALERT_SEVERITY=warning
ALERT_SUMMARY_TEXT=Payment recovery started for mia@example.com.
ALERT_DETAILS_TEXT=Provider: paystack
Subscription ID: 11111111-2222-3333-4444-555555555555
Recovery ID: rec_123
Provider payment ID: SUB_abc123
Grace ends: 2026-06-12T10:15:00.0000000Z
EVENT_REFERENCE_TEXT=rec_123
ACTION_URL=https://www.schink.co.za/admin
```

10. Password reset - Supabase Auth

Trigger	User password reset request, admin reset, admin bulk reset, or admin-created subscriber reset.
Provider	Supabase Auth, not local Resend.
Template body	Configured in Supabase Auth, not stored in this repo.
Endpoint	POST /auth/v1/recover

Request example sent by the system:

```
POST https://<supabase-project>/auth/v1/recover
Headers: apikey=<publishable-key>; Authorization=Bearer <publishable-key>
Payload:
{
  "email": "mia@example.com",
  "redirect_to": "https://www.schink.co.za/herstel-wagwoord"
}
```

Representative purpose:

Mia receives a Supabase password recovery link that returns to Schink Stories' /herstel-wagwoord flow.

11. Email change confirmation - Supabase Auth

Trigger	Signed-in user requests a new email and confirms current password.
Provider	Supabase Auth, not local Resend.
Callback	/intekening-en-betaling?emailChange=complete&emailChangeState=...
State lifetime	24 hours.

Request example sent by the system:

PUT https://<supabase-project>/auth/v1/user?redirect_to=https://www.schink.co.za/intekening-en-betaling?emailChange=complete...

Headers: apikey=<publishable-key>; Authorization=Bearer <user-access-token>

Payload:

```
{
  "email": "new-address@example.com"
}
```

Representative purpose:

The user receives Supabase's email-change confirmation message and returns to Schink Stories to complete the account email update.
